INFORMATION DISCLOSURE STATEMENT

Dear Sir:

Please find enclosed a Form 1449 listing documents that Applicants ask the Examiner to consider and make of record in this patent application. Copies of the listed documents are enclosed.

Applicants also enclose a copy of a photograph of a fuel pulse damper that was known by others in this country before the invention by Applicants.

The fuel pulse damper shown in the copy of the photograph includes a lower plastic housing having a quick connect fitting and a barbed fitting for connection to fuel supply conduits. An upper metallic housing is sealed to the lower plastic housing with a diaphragm disposed between the upper and lower housings. A chamber below the diaphragm receives the fuel and a chamber above the diaphragm is sealed and includes a coil spring located between a metal disk-shaped seat on the diaphragm and the upper housing.

Applicants ask the Examiner to consider the documents and the photograph and make them of record in this application.

Respectfully submitted,

Edward J. Timmer
